

The logo features the text "amc!" in a bold, red, sans-serif font with a slight 3D effect. The exclamation point is stylized with a red-to-white gradient and a dotted pattern at its top. Below "amc!" is the word "experience" in a dark grey, sans-serif font. The letter "x" in "experience" is uniquely styled with a red-to-white gradient and a dotted pattern, matching the exclamation point above. The background is white with faint, light grey geometric shapes and is framed by large red diagonal stripes on the left and right sides.

PROFESSIONAL VIDEO PRODUCTION MADE AFFORDABLE

LEMUR HIGHLIGHTS

- ❖ Fully automatic production without a person in the loop
- ❖ 4K live stream for live and VoD viewing
- ❖ Novel viewing experience in surround video app
- ❖ Production Suite for live and post-event production
- ❖ Low system cost and fraction of operating costs of conventional sports production
- ❖ Editing tools for viewers to slice player and highlight clips
- ❖ Easy installation on fixed rig, indoor and outdoor use, weatherproof (IP65)

AUTOMATE YOUR VIDEO PRODUCTION AND COVER IT ALL!

With the Lemur series, Pixellot introduces a fully automated video system producing high quality sports casts. Filming games without a person in the loop, the Lemur system allows clubs, schools, media, rights holders, coaches and venues to affordably capture professional and amateur events and make them available to fans, family and players in a variety of digital formats.

FROM SPORTS FIELD TO 2ND SCREEN

Designed as an end-to-end solution, the Lemur deploys a panoramic camera head and advanced auto-tracking algorithms to follow the flow of play. UHD capture is fed seamlessly from the sports field into web portals and 2nd screen applications where it can be watched as a TV-like webcast or in a novel panoramic video format. A series of intuitive editing tools allow fans to slice and share their own highlight clips. The Lemur Series includes a state-of-the-art Production Suite providing directors with full remote editing capabilities for live or post-event production.

AUTOMATE YOUR VIDEO PRODUCTION AND COVER IT ALL!

Fan engagement goes to the next level

Based on panoramic capture, Pixellot's Surround Video App introduces a novel interactive viewing experience, taking fan engagement to the next level. On their second screens, fans can navigate across the entire panoramic view and zoom into any area to watch and replay their favorite scenes. With zooming, tagging and clipping functions at their fingertips, viewers become directors and can create their own game and player videos.

LEMUR COACHING SOLUTION

High quality coaching videos to win the game

Coaches can now fully concentrate on their team and players, while the Lemur system automatically records practices and games. Getting the live stream directly to their tablet or mobile device, coaches can instantly tag important moves for later review or take a closer look at specific plays in the frame-by-frame player. Through the Pixellot Production Suite, footage can be edited live or post-game. Coaches can create high-quality video clips and access new levels of insight on team and player performance.
